INFORMATION DISCLOSURE STATEMENT

Applicant wishes to call to the attention of the Examiner the following prior art. Copies of the references are enclosed as is a completed form PTO/SB/08a.

Japanese patent publication no. 2002-209344

Japanese patent publication no. 09-103037

Japanese patent publication no. 2002-272020

Japanese patent publication no. 04-067732

Korean patent publication no. 1020020035242

Korean patent publication no. 1020020057469

Korean patent publication no. 1020050122669

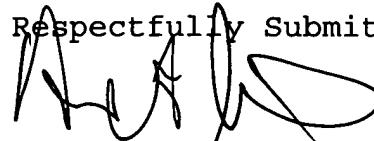

The invention of the present invention, as claimed, is distinguishable from all of the above listed references in that the references do not disclose a shield plate 260 having a film shape and a shield member 241.

Moreover, the battery pack B is configured such that a shield plate 260 having a film shape is interposed between the secondary core unit 210 and a battery case 250, thus preventing the temperature of the battery from increasing due to an induced electromotive force generated by the induction of an electromagnetic field and, therefore, enhancing the stability of the battery pack B, and is also configured such that sufficient electromotive force is generated by reducing the interference of the electromagnetic field caused by the induced electromotive force, thus enhancing the charging rate.

The shield member 241 is capable of blocking the electromagnetic field in order to prevent components inside the protection circuit unit 240 from being adversely affected.

From the foregoing it is seen that none of the cited references affects the claims in the instant application, as amended.

Respectfully Submitted,

Howard F. Mandelbaum
